songern is to send its runners about to dust at the feet of Gentile merchants and confidentially explaining to their obtuse understanding the true meaning of their delly effusions - a very commendable policy. It also informs the public that the non-intercourse principle applies only to those Gentiles who fail to mind their own business." The question naturally arises, who are they who unfortunate as to be excluded from the favored "mind-your-own-busiacti" class?. We presume some of them are those who -- when they found their letters scattered about the streets in fragments, and were anable to get them through the Post-office at all, and hence made complaint at Washington -succooded in having an honest and competent Postmaster appointed in this city in place of the editor of the Telegraph Another class are those who like our-

Perhaps some of them belong to that class who think it unjust that they cannot go into a private room with a friend and quietly indulge in a glass of wine without anbjecting themselves to arrest and annayance, while another class is allowed to roam about the streets by day or night disturbing and territying peaceable citizens by their bacchanapalles demonstrations.

But in general terms, we presume, the whole proscribed class will be included among those who do not see fit to have their duties as citizens dictated to them by a elique of foreign writers, who can hardly speak our language, and who nevor drow a loyal breath since they came to Utah, individuals who are the pliant tools of Brigham Young-s person who dares not go outside of this Territory where the laws of his country can be rist Received. ....

Such are the men to whont we must bow the knee or suffer excommunication. For ourselves we have to say that we of the Theritory, and in every way do our duty as law abiding citizens of Utah, which we intend to make our personnel. The Judge came to Utah to inspect its mineral resources, a task for which he is admirably qualified. Tomorrow we shall farth wire readers with an interesting communication from his pen, in which he gives the gesult of him bservations

Friday, Saturday and Sunday a large number of persons went out to them, and yesterday over a hundred left for the same point. Several have rethem are substantially as follows; No one has reached the bed-rock yet, but on the surface and six feet down the dirt pligh from three to fen genta per pan, and they will have to dig down fifteep or twenty feet yet before atriking the bed-rock.
